Get user's federations

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
--------	----------	-----	---------

All containers/elements for the selected version and action type are shown.

```
<?xml version="1.0" encoding="utf-8"?>
<HattrickData>
  <Pages> : unsigned Integer
    Number of result pages.
  </Pages>
  <PageIndex> : unsigned Integer
    Zero based pageindex. If searchresult results in more than one page you will know the total number of pages. Each result may not return more than 10 rows.
  </PageIndex>
  <UserSupporterTier> : supporterTier
    Indicates which Supporter package the fetching user has, or empty if not a Supporter.
  </UserSupporterTier>
  <Alliances>
    <Alliance>
      <AllianceID> : unsigned Integer
        The globally unique AllianceID.
      </AllianceID>
      <AllianceName> : String (HTML encoded)
        The name of the federation.
      </AllianceName>
      <AllianceDescription> : String (HTML encoded)
        Description of the federation.
      </AllianceDescription>
    </Alliance>
  </Alliances>
</HattrickData>
```
