Which league to show statistics for. 0 = global statistic

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
--------	----------	-----	---------

All containers and elements for the selected file version and action type are shown.

- HatrickData
Hattrick Data Container

- Arena
Container for the data about the arena.

ArenaID : [unsigned Integer](#)
The globally unique arenaID.

ArenaName : [String](#)

The name of the arena.

ArenaImage : String

URL to an image of the arena

ArenaFallbackImage : String

The default image for an arena of this size, use this only when the ArenaImage fails to load.

- Team

Container for the data about the team owning this arena.

TeamID : unsigned Integer

The globally unique teamID.

TeamName : String

The name of the team.

- League

Container for the data about the league of the arena's team.

LeagueID : unsigned Integer

The globally unique leagueID.

LeagueName : String

The name of the league.

- Region

Container for the data about the region of the arena.

RegionID : unsigned Integer

The globally unique regionID.

RegionName : String

The name of the region.

- CurrentCapacity

Container for the data about the current capacity of the arena.

RebuiltDate : DateTime

The date when current capacity was reached. If the arena is under construction an attribute named Available is set to false and the container is then empty, otherwise Available is set to true.

Terraces : unsigned Integer

The current capacity on the terraces.

Basic : unsigned Integer

The current capacity on the basic seats.

Roof : unsigned Integer

The current capacity on the seats under roof.

VIP : unsigned Integer

The current capacity in the VIP lounge.

Total : unsigned Integer

The arenas current total capacity.

- ExpandedCapacity

Container for the data about the expanded capacity of the arena during construction. If the arena is under construction an attribute named Available is set to true, otherwise to false and the container is then empty.

ExpansionDate : DateTime

The preliminary date when the expansion is finished.

Terraces : unsigned Integer

The expanded capacity on the terraces.

Basic : unsigned Integer

The expanded capacity on the basic seats.

Roof : unsigned Integer

The expanded capacity on the seats under roof.

VIP : unsigned Integer

The expanded capacity in the VIP lounge.

Total : unsigned Integer

The expanded current total capacity.
