Challenges

Challenges

Changelog [\(show\)](#)

Input

The following input parameters exist:

Simple	Detailed
--------	----------

Inputs for all different file versions are shown and marked.

required file = challenges

optional version = 1.6 ▼

optional actionType = view {default} ▼
Indicates what type of action the page should perform.

view {default}
Returns data on the challenges you have made and the offers you have received.

challengeable
Check if it is possible to challenge the teams specified in parameter suggestedTeamIds. (Requires "manage_challenges" scope.)

optional suggestedTeamIds : String
A comma-separated list of teamid numbers for the teams that you want to check challengeable status for.

challenge
Challenge an opponent to a friendly match. See parameter list above for which parameters must be specified to create the challenge. It allows CHPP to book a friendly match regardless of the users settings on the site, as long as both users have the extended permission necessary. (Requires "manage_challenges" scope.)

required opponentTeamId : unsigned Integer
The teamid of the team you want to challenge.

optional matchType : unsigned Integer {Default:0}
Specifies whether to challenge for a normal friendly (0) or a friendly with cup rules (1).

optional_1 matchPlace : unsigned Integer {Default:0}
Defines if challenger wants to play home (0), away (1) or on a neutral arena (2).

optional_1 neutralArenaId : unsigned Integer {Default:0}
ArenaId for arena where friendly on neutral ground should be played.

accept
Accept a challenge from an opponent. (Requires "manage_challenges" scope.)

optional trainingMatchId : unsigned Integer
Specifies the training match id for the friendly offer to accept.

decline
Decline a challenge from an opponent. (Requires "manage_challenges" scope.)

optional trainingMatchId : unsigned Integer
Specifies the training match id for the friendly offer to decline.

withdraw
Withdraw a not yet accepted challenge. (Requires "manage_challenges" scope.)

optional trainingMatchId : unsigned Integer
Specifies the training match id for the friendly offer to withdraw.

optional teamId : unsigned Integer {Default:Your primary club senior teamId}
Team id to manage challenges for. Must refer to a senior team managed by requesting user.

optional isWeekendFriendly : unsigned Integer {Default:0}
Show weekend Friendly match och use it to set data for weekend friendly

optional_1: If matchPlace = 2, then you have to set the arena in neutralArenaId!

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
All containers/elements for the selected version and action type are shown.			
		<pre><?xml version="1.0" encoding="utf-8"?> - <HatrickData> - <Team> <TeamID> : unsigned Integer The globally unique nationalTeamID. </TeamID> <TeamName> : String The team name. </TeamName> - <ChallengesByMe> - <Challenge> <TrainingMatchID> : unsigned Integer The globally unique identifier for the challenge/offer. </TrainingMatchID> <MatchTime> : unsigned Integer The match start time. </MatchTime> <MatchID> : unsigned Integer The matchid for the match that was created for an accepted challenge. </MatchID> <FriendlyType> : unsigned Integer Integer defining the type of friendly. </FriendlyType> - <Opponent> <TeamID> : unsigned Integer The globally unique nationalTeamID. </TeamID> <TeamName> : String The team name. </TeamName> <LogoURL> : URL The url for the opponent's logo, if it has one. </LogoURL> - <Arena> <ArenaID> : unsigned Integer The globally unique arenaID. </ArenaID> <ArenaName> : String The name of the arena. </ArenaName> - <Country> <CountryID> : unsigned Integer The globally unique CountryID. </CountryID> <CountryName> : String The country name. </CountryName> </Country> <IsAgreed> : Boolean Indicating whether the challenge/offer has been accepted and the match arranged. </IsAgreed> </Opponent> </Challenge> </ChallengesByMe> - <OffersByOthers> - <Offer> <TrainingMatchID> : unsigned Integer The globally unique identifier for the challenge/offer. </TrainingMatchID> <MatchTime> : unsigned Integer The match start time. </MatchTime> <MatchID> : unsigned Integer The matchid for the match that was created for an accepted challenge. </MatchID> <FriendlyType> : unsigned Integer Integer defining the type of friendly. </FriendlyType> - <Opponent> <TeamID> : unsigned Integer The globally unique nationalTeamID. </TeamID> <TeamName> : String</pre>	

```

    The team name.
</TeamName>
