Tournament Fixtures

Information about matches for a tournament. This is only available for the current season. For non-restarted tournaments this is available for 2 seasons after the tournament finished.

Changelog [\(show\)](#)

Input

The following input parameters exist:

Simple	Detailed
--------	----------

Only available inputs in this file version are shown.

required file = tournamentfixtures

optional version = 1.1 ▼

required tournamentId : [unsigned Integer](#)
The id for the tournament to get data for.

optional season : [unsigned Integer](#)
The starting season of the tournament. This is available only for National Teams cups.

optional matchRound : [unsigned Integer](#)
Specific match round for this tournament. It will pick the last match round if the selected round is greater than the tournament's last round.

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
--------	----------	-----	---------

All containers/elements for the selected version and action type are shown.

```
<?xml version="1.0" encoding="utf-8"?>
<HattrickData>
  <Matches>
    <Match>
      <MatchId> : unsigned Integer
        The globally unique match id for tournament, ladder and single matches.
      </MatchId>
      <HomeTeamId> : unsigned Integer
        The teamID of the Home team in the match.
      </HomeTeamId>
      <HomeTeamName> : String
        The team name of the Home team in the match.
      </HomeTeamName>
      <HomeShortTeamName> : String
