Translations

Translations for the denominations in the game. This file is NOT meant to be fetched on each user session, but instead every certain period of time, like once a week, and store the values in the app.

Changelog [\(show\)](#)

Input

The following input parameters exist:

Simple	Detailed
--------	----------

Only available inputs in this file version are shown.

required file = translations

optional version = 1.2 ▼

required languageld : unsigned Integer
The id of the language to get the translations for.

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
--------	----------	-----	---------

All containers/elements for the selected version and action type are shown.

```
<?xml version="1.0" encoding="utf-8"?>
