World Details

General Information about all countries in HT World

Changelog (show)

Input

The following input parameters exist:

|        |          |
|--------|----------|
| Simple | Detailed |
|--------|----------|

Only available inputs in this file version are shown.

**required** file = worlddetails

**optional** version = 2.0 ▼

**optional** includeRegions = false (default) ▼  
Indicates if regions should be shown or not.

**false** {default}  
No regions for the countries are shown at all.

**true**  
All regions for the countries are shown.

**optional\_1** countryID : unsigned Integer  
The countryID to get information for.

**optional\_1** leagueID : unsigned Integer  
The leagueID to get information for.

**optional\_1:** You can set countryID or leagueID or none. If countryID and leagueID is set, leagueID is used! If none is set, all leagues/contries are shown!

Output

Here you can see the output, based on the values of the input parameters and selected action type.

|        |          |     |         |
|--------|----------|-----|---------|
| Simple | Detailed | XML | Example |
|--------|----------|-----|---------|

All containers/elements for the selected version and action type are shown.

```
<?xml version="1.0" encoding="utf-8"?>
<HattrickData>
  <LeagueList>
    <League>
      <LeagueID> : unsigned Integer
        The globally unique LeagueID.
      </LeagueID>
      <LeagueName> : String
        The League name.
      </LeagueName>
      <Season> : unsigned Integer
        The current season number of the league.
      </Season>
      <SeasonOffset> : Integer
        The season offset to swedish's season.
      </SeasonOffset>
      <MatchRound> : unsigned Integer
        The current match round of the league.
      </MatchRound>
      <ShortName> : String
        The short name of the league (used in some places with little room on the site).
      </ShortName>
      <Continent> : String
        The name of the continent it is defined to be part of in Hattrick.
      </Continent>
      <ZoneName> : String
        The name of the zone the league is defined to be part of in Hattrick.
      </ZoneName>
```

```

<EnglishName> : String
    The English name of the league.
</EnglishName>
<LeagueSystemID> : LeagueSystemID
    The system type of the league.
</LeagueSystemID>
<LanguageId> : unsigned Integer
    The ID of the default language of the league.
</LanguageId>
<LanguageName> : String
    The name of the default language of the league.
</LanguageName>
- <Country Available='Boolean'>
    <CountryID> : unsigned Integer
        The globally unique CountryID of country.
    </CountryID>
    <CountryName> : String
        The name of the country.
    </CountryName>
    <CurrencyName> : String
        The name of the currency in this country.
    </CurrencyName>
    <CurrencyRate> : Decimal
        Decimal value specifying the relative currency rate to SEK (swedish krona).
    </CurrencyRate>
    <CountryCode> : String
        The country code for this country.
    </CountryCode>
    <DateFormat> : String
        The date format for users of this country using ISO 8601
    </DateFormat>
    <TimeFormat> : String
        The time format for users of this country using ISO 8601
    </TimeFormat>
</Country>
- <Cups>
    - <Cup>
        <CupID> : unsigned Integer
            Globally unique CupID.
        </CupID>
        <CupName> : String
            Name of the cup.
        </CupName>
        <CupLeagueLevel> : unsigned Integer
            LeagueLevel for the cup. 0 = National (LeagueLevel 1-6), 7-9 = Divisional.
        </CupLeagueLevel>
        <CupLevel> : unsigned Integer
            Level of the cup. 1 = National/Divisional, 2 = Challenger, 3 = Consolation.
        </CupLevel>
        <CupLevelIndex> : unsigned Integer
            Index of the cup. Always 1 for National and Consolation cups, for Challenger cup: 1 = Emerald, 2 = Ruby, 3 = Sapphire.
        </CupLevelIndex>
        <MatchRound> : unsigned Integer
            The last played matchround (or currently played if matches are ongoing). (Note that this is different from TeamDetails!).
        </MatchRound>
        <MatchRoundsLeft> : unsigned Integer
            How many rounds are left of this cup.
        </MatchRoundsLeft>
    </Cup>
</Cups>
<NationalTeamId> : unsigned Integer
    The id of the national team of the league.
</NationalTeamId>
<U20teamId> : unsigned Integer
    The id of the U-20 national team of the league.
</U20teamId>
<ActiveTeams> : unsigned Integer
    Integer specifying the number of active teams in the league, as of last daily count.
</ActiveTeams>
<ActiveUsers> : unsigned Integer
    Integer specifying the number of active users in the league, as of last daily count.
</ActiveUsers>
<WaitingUsers> : unsigned Integer
    Integer specifying the number of users on the waiting list in the league. These users are not included in the ActiveUsers, so ActiveUsers +
    WaitingUsers would give a sort of total number of users.
</WaitingUsers>
<TrainingDate> : DateTime
    The date and time when the next training update will start in this league.
</TrainingDate>
<EconomyDate> : DateTime

```

```

    The date and time when the next economy update will start in this league.
</EconomyDate>
<CupMatchDate> : DateTime
    The date and time when the next cup round is being checked for (that is, there are not necessarily any matches to play, if the cup has been finish
</CupMatchDate>
<SeriesMatchDate> : DateTime
    The date and time when the next series match round starts. Some leagues may have several series match dates - then this data gives the date w
    the first batch for the league starts.
</SeriesMatchDate>
<Sequence1> : DateTime
    Time and date for an upcoming daily update.
</Sequence1>
<Sequence2> : DateTime
    Time and date for an upcoming daily update.
</Sequence2>
<Sequence3> : DateTime
    Time and date for an upcoming daily update.
</Sequence3>
<Sequence5> : DateTime
    Time and date for an upcoming daily update.
</Sequence5>
<Sequence7> : DateTime
    Time and date for an upcoming daily update, including the confidence.
</Sequence7>
<NumberOfLevels> : unsigned Integer
    Integer representing the number of LeagueLevels (divisions) active for this league.
</NumberOfLevels>
</League>
</LeagueList>
</HattrickData>
```
