Youth Playlist

Youth Players.

Changelog [\(show\)](#)

Input

The following input parameters exist:

Simple	Detailed
--------	----------

Only available inputs in this file version are shown.

required

file = youthplaylist

optional

version = 1.3

optional

actionType = list {default}

Indicates what type of action the page should perform.

list {default}

List the players, containing only playerId and Name-containers.

details

Show detailed players information.

unlockskills

Unlock the skills of the entire team before showing the players information (as details). (Requires "manage_youthplayers" scope.)

optional

orderBy : String {Default:PlayerNumber}

The field that the outdata PlayerList should be sorted by.

optional

youthTeamID : unsigned Integer {Default:Logged on user's youth team ID}

The youth team for which the data should apply to.

optional

showScoutCall : Boolean {Default:false}

Set it to 'true' to get the information the scout provided when you pulled the player. Only available if actionType=details or actionType=unlockskills

optional

showLastMatch : Boolean {Default:false}

Set it to 'true' to get LastMatch container. Only available if actionType=details or actionType=unlockskills.

Output

Here you can see the output, based on the values of the input parameters and selected action type.

Simple	Detailed	XML	Example
--------	----------	-----	---------

All containers/elements for the selected version and action type are shown.

```
<?xml version="1.0" encoding="utf-8"?>
<HattrickData>
  <PlayerList>
    <YouthPlayer>
      <YouthPlayerID> : unsigned Integer
        The globally unique youthPlayerID.
      </YouthPlayerID>
      <FirstName> : String
        Player's FirstName name.
      </FirstName>
      <NickName> : String
        Player's NickName name.
      </NickName>
      <LastName> : String
        Player's LastName name.
      </LastName>
      <GenderID> : GenderID
        The player gender
      </GenderID>
    </YouthPlayer>
  </PlayerList>
```

</HattrickData>
